SUMMARY REPORT OF THE HENDERSON COUNTY RISK AND NEEDS ASSESSMENT COMMITTEE

- I. Risk Assessment Summary
- II. Needs Assessment Summary
- III. Resource Assessment Summary
- IV. Summary of Gaps and Barriers in the Community Continuum
- V. Proposed Priority Services for Funding

Part I. Risk

The Risk and Needs Assessment Committee reviewed data gleaned from the Juvenile Risk Assessment instrument administered by Juvenile Court Counselors after juveniles are referred with a complaint alleging that a delinquent act has occurred and prior to adjudication of the juvenile. The Juvenile Risk Assessment is an instrument used to predict the likelihood of the juvenile being involved in future delinquent behavior. For some youth, some of the individual item ratings may be heavily dependent upon information reported by the juvenile or the parent(s). For these items (*represented by percentages which with a star next to them*), there is a likelihood of under-reporting the incidence of a particular behavior and the actual incidence may be higher than suggested by these figures. In those cases, the figure should be interpreted as a measure of the minimum level of occurrence. **173 Assessments Total**

County Risk Factor Observations: FY 2015 – 2016

R0 Overall Risk Level – Observations: 71% of assessed youth are low risk for future delinquent behavior (higher than state rate for past 2 years) 20% are medium risk for future delinquent behavior.

R1 Age for First Delinquent Offense Alleged in a Complaint – Elevated observations: 86% of assessed youth are age 12 or older for first delinquent offense (increase from previous year's rate and higher than state rate.)

R2 Number of Undisciplined Referrals at Intake – Elevated Observations: 39% of assessed youth have prior referrals (increase from previous year & higher than state). 12% of assessed youth have four or more prior referrals (increase from previous year & higher than state). 19% of assessed youth have one prior referral (increase from previous year & higher than state).

Part II. Needs

The Risk and Needs Assessment Committee also reviewed data gleaned from the Juvenile Needs Assessment instrument administered by Juvenile Court Counselors prior to court disposition of a juvenile. The Juvenile Needs Assessment is an instrument used to examine a youth's needs in the various domains of his life: The Individual Domain, The School Domain, The Peer Domain, and the Community Domain. This instrument was designed to detect service intervention needs as an aid in service planning. As with the Juvenile Risk Assessment, some of the individual item ratings may be heavily dependent upon information reported by the juvenile or the parent(s). For these items (*represented by percentages which with a star next to them*), there is a likelihood of under-reporting the incidence of a particular behavior and the actual incidence may be higher than suggested by these figures. In those cases, the figure should be interpreted as a measure of the minimum level of occurrence.

County Elevated Needs Observations: FY 2015 -2016

Y0 Overall Needs Level – Observations: 41% of assessed youth have medium to high level intervention needs (decrease from previous year's rate but higher than the state's rate.)
