

# Draft Local Input Points for Regional Impact Transportation Projects

FRENCH BROAD RIVER METROPOLITAN PLANNING ORGANIZATION

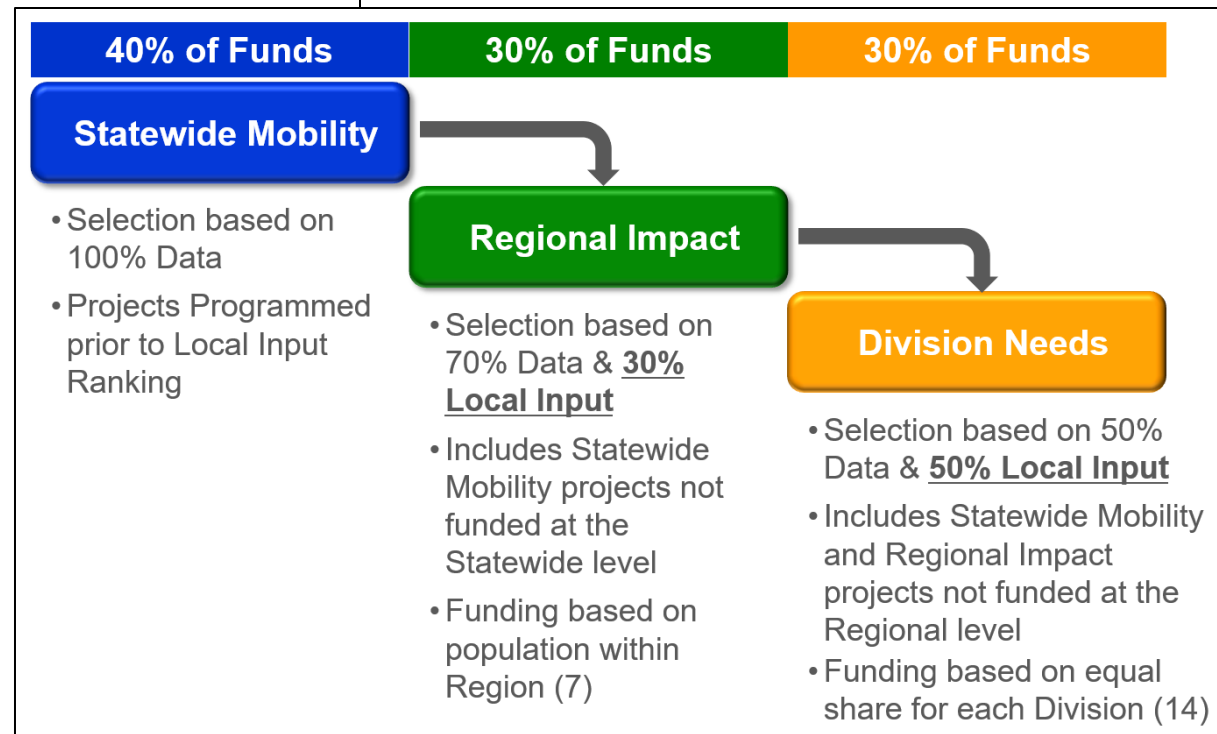

MAY 25, 2018

## INTRODUCTION

The Strategic Transportation Investments (STI) law governs the process in which the State of North Carolina prioritizes transportation projects. The law was passed in 2013 with the intent of creating a data-driven, collaborative process between NCDOT, planning organizations, local governments, and the public to efficiently utilize funding for transportation improvements across the state.

As part of the prioritization process, projects are solicited from planning organizations and NCDOT Divisions. Projects submitted into the prioritization process are placed into three different funding categories based on facility and project types: Statewide Mobility, Regional Impact, and Division Needs. Project scoring for the Statewide Mobility funding category is based solely on quantitative data developed by the Prioritization

Workgroup. Metropolitan Planning Organizations (MPOs), Rural Planning Organizations (RPOs), and Division Engineers assign local input points to projects in the Regional Impact and Division Needs funding categories. These points are applied in the calculation of the final project scores for Prioritization 5.0 to determine which projects are funded at the Regional Impact and Division Needs funding categories.

To ensure local input points are being applied through a process that is transparent, MPOs and RPOs are required to develop a methodology that outlines how they will determine which projects will have local input points applied. This local input methodology for the French Broad River MPO has been developed to meet the requirements of Session Law 2012-84 which requires that MPOs and RPOs have a process that includes at least two criteria (with at least one being qualitative), for determining project prioritization.

## MPO METHODOLOGY

The French Broad River [MPO's methodology](http://www.fbrmpo.org/spot/) for assigning local input points is available- in full- on the MPO website (<http://www.fbrmpo.org/spot/>), but to paraphrase, the MPO's methodology is based on the following tenants:

- The MPO will not “cascade” projects from one funding category to another by default, but will consider cascading projects on a case-by-case basis
- The MPO will assign local input points on projects, based on its approved methodology, until it has either exhausted its local input points (1,800) or until the

estimated amount of funding available for Region G (plus an additional 20%) has been exhausted

- The MPO Board may decide to make exceptions to the methodology based on public input, coordination with NCDOT, or at the Board's discretion

The MPO's methodology gives projects up to 100 points. Quantitative data (congestion, safety, multimodal, environmental, and freight) makes up 75% of the overall score. Qualitative data (local priorities as determined by local government staff or the Henderson County Transportation Advisory Committee) makes up the remaining 25% of the overall score. The score of the projects based on the MPO's methodology helps to recommend to the MPO Board what projects should receive local input points.

## THE EFFECT OF LOCAL INPUT POINTS

The MPO's allocation of local input points on projects in the Regional Impact and Division Needs funding categories plays a part in determining the project's overall score in the state's prioritization process. For each funding category the MPO's allocation of local input points accounts for the following percentage of a project's P 5.0 score:

Regional Impact Funding Category – 15%

Division Needs Funding Category – 25%

NCDOT Division Engineers may also allocate points to projects in MPO Planning Area.

## PROCESS AND TIMELINE

The general process for applying local input points for Regional Impact projects in the French Broad River MPO is as follows:

Task	Date
<b>May 24, 2018</b>	MPO Board approves cascaded projects and Draft Local Input Points
<b>June 6, 2018</b>	Public Comment on Draft Local Input Points opens
<b>June 14, 2018</b>	MPO TCC recommends Final Local Input Point allocation
<b>June 27, 2018</b>	Public Comment on Draft Local Input Points closes
<b>June 28, 2018</b>	MPO Board approves Final Local Input Point allocation

## DRAFT LOCAL INPUT POINTS

On May 24, 2018, the MPO Board elected to cascade three projects from the Statewide Mobility category to the Regional Impact category. These projects include:

- I-2513A – the widening of I-26/I-240 from I-40 to North of Haywood Road
- I-4400A – the widening of I-26 from US 25 (south of Flat Rock) to US 64 in Henderson County
- I-40 widening from Monte Vista Road to Wiggins Road in Buncombe County (NOTE: only \$11,000,000 for right-of-way is expected to be programmed based on NCDOT input)

The MPO Board also approved an exception to the methodology to put points on a modernization projects on US 276 (Johnathan Creek Road) from US 19 to I-40 in Haywood County.

## FUNDING AND POINTS

All of the counties in NCDOT Divisions 13 and 14, compete for funding in the Regional Impact category in "Region G." Funding is proportionally allocated to different regions around the state based on population. The following information is based on information made available from NCDOT for P 5.0.

Total Amount of Funding Estimated for Region G  
**\$244,818,000**

Total Amount of Funding Estimated for +20%  
**\$293,781,600**

Total Estimated Cost of Projects Receiving MPO  
Local Input Points  
**\$307,900,000**

SPOT ID	TIP	Project Category	Route	From / Cross Street	To	Description	Cost to NCDOT	Regional Impact Quantitative Score (Out of 70)	County(s)	MPO Score	Draft Local Input Points
H140302		Regional Impact	US 74 Alternate (Fairview Road)	NC 81 (Swannanoa River Road)	Cedar Street	Implement Access Management and spot intersection improvements. Include complete streets elements.	\$ 17,000,000	37.74	Buncombe	83	100
H172309		Regional Impact	NC 280 (Boylston Hwy)	NC 191 Northern Intersection (Old Haywood Road)	NC 191 Southern Intersection (Haywood Road)	Upgrade Roadway with Access Management and Intersection realignment and improvements.	\$ 9,600,000	47.36	Henderson	80	100
H111315	U-6046	Regional Impact	NC 81 (Swannanoa River Road)	US 70 (Tunnel Road)	US 74 (South Tunnel Road)	Add Roadway Improvements with Complete Streets elements.	\$ 23,100,000	33.71	Buncombe	77	100
H129600-A	I-2513A	Statewide Mobility	I-26, I-240	North of I-26/I-40 Split	North of SR 3548 (Haywood Road)	Add Additional Lanes.	\$ 81,700,000	43.84	Buncombe	71	100
H170990		Regional Impact	US 25 ALT (Sweeten Creek Road)	I-40	London Road	Modernize roadway by adding turn lanes, access management and intersection improvements with complete streets elements.	\$ 14,100,000	28.74	Buncombe	62	100
H172137		Regional Impact	US 19 (Soco Road)	SR 1304 (Fie Top Road at Ghost Town in the Sky)	Blue Ridge Parkway	Modernize Roadway.	\$ 26,600,000	34.45	Haywood	60	100
H171816		Statewide Mobility	I-40	SR 1200 (Wiggins Road), Exit 37	SR 1224 (Monte Vista Road)	Add additional lanes	\$102,900,000 (only \$11,000,000 assumed to be programmed)	42.88	Buncombe	60	100
